# What is AlieNft?

ALNFT is a custom non-fungible token (NFT) that is inspired by the Aliens universe.

This NFT Collection can only be acquired by buying it from the ALNFT store with ALNFT Tokens and contains all types of aliens, and more collections will be dropped down the road in our marketplace.

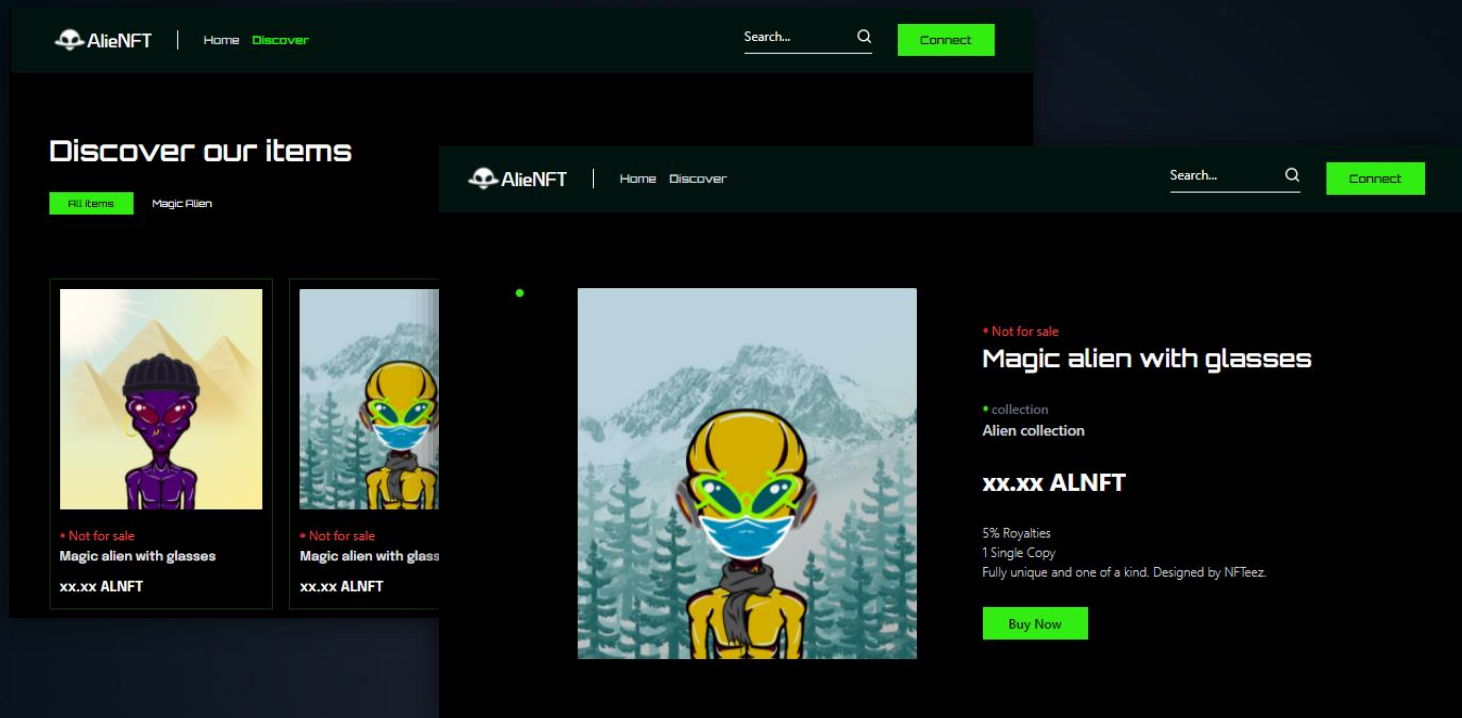

# Why AlieNft?

We are a project with a clear vision, solid team, and simple Tokenomics. Start with the limited amount of tokens but expand with the growing popularity of your collection.

We plan to keep the buying pressure with our Solid Marketing. And the Rewards system will encourage buyers to buy more, and holders to hold.

# AlieNft Marketplace

The users should be able to create their NFT products and sell them. Moreover, our marketplaces offer additional functions to attract and keep more clients and to improve the general user experience on the website, also we have our NFT collections ready to be dropped on the marketplace directly after the presale.

# ALNFT token utility?

ALNFT is a utility token that has been created to be used for multiple purposes. The main reason for its creation was to ensure that our users have the opportunity to earn passive income through our passive income projects. Other utilities are currently being developed for the token.

Our token is secured by the Binance exchange, so users can rest easy knowing they can sell their tokens at any time they wish. ALNFT can be used in several ways to ensure that its utility is fully maximized.

# How we got the idea?

Well. It's not just the cryptocurrencies that are surging, but digital tokens called NFTs (or Non-Fungible Tokens) are skyrocketing in popularity. These tokens, which possess different and unique traits and features, transcend the cryptocurrency and blockchain industries and will soon be the next big thing. So we decided to create a NFT Collection. This collection will be the first collection for aliens and will be exclusive in our marketplace.

# TOKENOMICS

For the token tax distribution, 13% will be taxed on each transaction divided into four parts

**3% Burn:** This creates a true burn, meaning you can exchange the actual value for the tokens you sent to the burn wallet.

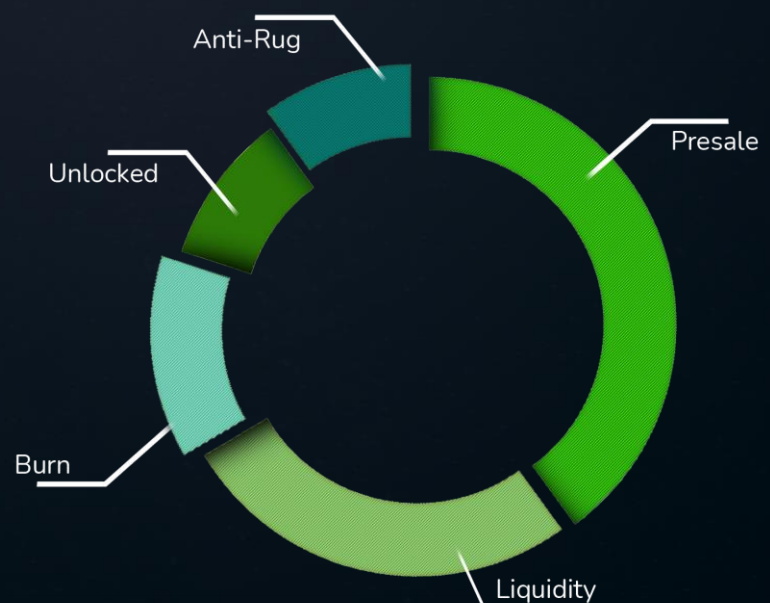

**3% Marketing:** This percentage of each transaction will be sent to the marketing wallet which will help the team with sustaining organic growth and hype for the token.

**3% Buyback:** This percentage of every transaction will be automatically made a Buyback to make sure the token has stable growth in order to create a rising price floor and stability.

**3% Rewards** of each transaction are redistributed to holders in ADA (bep20).

Also here are some token distribution details:

<i>Anti-rug</i>	<i>10%</i>
<i>Burn</i>	<i>13.47%</i>
<i>Unlocked</i>	<i>10.27%</i>
<i>Presale</i>	<i>40%</i>
<i>Liquidity</i>	<i>26,40%</i>

# Roadmap

This Project is worked on by a professional team to bring this vision to life – through simple Tokenomics and Solid Marketing. This Token will be at the same time – a reward for early birds during Token presale, and Solid Locking for the latecomers.

The team has great experience in this field and is ready to make the project work with the new market conditions to keep it on high demand.

***Making art trading available to everyone in the world is our cause. We will make this happen in the next few months.***
